

CIVIL TRAIN

The Training Division of the CCF

SHORT COURSE

Locating Underground Services

RIICCM202D Identify, locate and protect underground services

Are you required to locate underground services in a civil construction context?

COURSE OVERVIEW

Underground pipes and cables carry vital services such as water, electricity, communications and gas. It is essential to identify existing underground services prior to commencing a job to save time and ensure a safe work environment.

Identifying and locating underground services requires the work to be well planned and safely carried out according to site procedures and State or Territory legislative requirements, including obtaining necessary permits, approvals and DBYD plans.

Safety is of prime concern to all working in identifying and locating underground services. Workers must at all times during operations be aware of their responsibilities for worker safety and to protect the environment.

COURSE OUTCOME

On completion of the course you will be able to:

- Plan and prepare for identify, locate and protect underground services
- Locate underground services
- Conduct housekeeping activities

If successful you will receive a Statement of Attainment.

COURSE DURATION

This course is one day (8 hours)

DELIVERY AND ASSESSMENT

This course is delivered and assessed face to face.
